Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a process for producing an allysine acetal, classified in class 435, subclass 148.
- II. Claim 11, drawn to a method for producing a pharmaceutical or biologically active product using an acetal, classified in class 514, subclass 476.

The inventions are distinct, each from the other because:

The two groups are drawn to different processes that are mutually exclusive and patentably distinct. Group I is drawn to making an acetal by using enzymes. Group II is drawn to producing a pharmaceutical produce by using the acetal. This group reads on using the acetal regardless of the source to produce a pharmaceutical.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Patterson, Jr., PhD, whose telephone number is 703-308-1834. The examiner can normally be reached on Monday - Friday, 7:30-4:00.
